Data scientist with 3 years of experience spanning data infrastructure, campaign analytics, and partnership strategy, with a track record of translating data into measurable business and revenue impact.

Professional Experience

Kulfi Collective

Associate Data Scientist

05/2025 – Present

- Designed and built multiple end-to-end data pipelines and automated creator discovery modules powering a proprietary cultural intelligence platform cutting manual data processing by ~70%, improving workflow accuracy by ~80%, and driving 150%+ uplift in average views and 220%+ uplift in engagement for client campaigns across Spotify India, Meta and Swiggy.
- Own data quality and infrastructure scaling across pipelines ingesting from multiple platforms daily, partnering with engineering and strategy teams to ensure reliable, real-time outputs for 20+ live client engagements.
- Conduct ongoing product analysis for the platform: identifying feature gaps, defining what metrics and signals the platform should track, and incorporating stakeholder feedback to shape its roadmap.

Data Analytics Intern

06/2024 – 04/2025

- Conducted social listening and primary research to identify emerging cultural trends and relevant creators, building cultural calendars that directly informed campaign strategy for 10+ brands, including Meta and Swiggy.

Majid Al Futtaim

Data Analytics Intern

09/2023 – 03/2024

- Analyzed data to develop business cases that supported \$3M+ partnership negotiations with institutions like Mastercard & VISA, driving 10% sales growth and \$1M+ increased revenue.
- Conducted detailed analysis of campaigns, evaluating budget utilization, incremental GMV, CAC to assess campaign success and optimize future strategies for driving business growth.
- Managed monthly reconciliations of over \$10M USD in financial transactions, identifying data gaps and collaborating with cross-functional teams to achieve 95% reporting accuracy.

Maskottchen Technology

Python Development Intern

08/2023 – 09/2023

- Developed a Python-based Telegram bot to track real-time Bitcoin prices, send alerts, and provide historical trend analysis.
- Enabled user queries, automated updates, and visual insights through an intuitive conversational interface.

WA Team

Tech Management Intern

06/2022 – 10/2022

- Supported the digital marketing team in managing and optimizing products on a WordPress-based ecommerce site.
- Collaborated with product managers to ensure accurate product information.

Education

PG Diploma in AI & ML, 2026

Indian Institute of Technology, Madras

BS Data Science & Applications, 2025

Indian Institute of Technology, Madras

Societies & Activities: Alpha Gamma Nu (Core Team – Operations & Management), Boundless (Core Team – Research), Paradox (Student Relations Volunteer).

BSc Data Science & Business Analytics, 2023

School of Data Science & Business Intelligence, Mumbai

HSC, 2020

HR College of Commerce & Economics

Volunteering Experience

Bhumi NGO

Led 8 workshops with a team on Environmental education for eighth grade students ensuing in lively participation from the students and acquired great feedback.

Skills

- Languages: Python, R, SQL, NoSQL, Scala, HTML, CSS, Vue.js
- Tools: PowerBI, Tableau, Excel, MongoDB

Certifications

- Google Data Analytics Professional Certificate
- Google Workspace Professional Certificate
- Understanding and Visualizing Data in Python, University of Michigan
